

Earth Light® Dimmable

The efficiency of compact fluorescent lighting without sacrificing the convenience of dimmability, the economy of occupancy sensors or outstanding performance over a broad temperature range.

Earth Light® Lamps

This high-demand, award-winning collection of specialized compact fluorescent lamps is designed to fit the nuances of multiple applications. Featuring medium screw bases for easy incandescent replacement, stable light output over a broad temperature range and a variety of shapes, sizes and wattages, Philips Earth Lights meet the industry's highest quality standards.

Philips ALTO® PL-T Compact Fluorescent Lamps

Ultra-compact sizes (25 percent shorter than regular PL-C lamps), 4-Pin dimmability, superior efficacy, stable thermal performance and now, TCLP-compliance, makes the industry's best compact fluorescent downlight even better.

Philips PL Collection

A sleek and versatile high-efficiency system replacement for incandescent lamps featuring compact design, superior performance, long life, high quality light and thermal stability over a broad temperature range (in PL-T configurations). Available in an extensive array of color temperatures, lumen packages, wattages and configurations for maximum design and application flexibility.
