

MasterColor® Family of Metal Halide Lamps

This groundbreaking color advancement in metal halide technology offers retailers a cost-effective alternative to halogen sources. Featuring unmatched color consistency lamp-to-lamp and throughout life, superior CRI and FadeBlock™ technology, MasterColor lamps come in multiple shapes, sizes and two color temperatures for maximum versatility. MasterColor was awarded “Best New Product of the Year” by both LightFair International (1995, top) and Lighting Dimensions International (1998, bottom).

ALTO® HPS Featuring Prompter™ End-of-Life Indicator

Solving a long-standing industry problem by clearly signaling the need for replacement, this TCLP-compliant HPS lamp with non-cycling end-of-life increases safety, prevents ignitor/ballast failures and is resistant to outages caused by vibration or line voltage fluctuations.

Pulse Start Metal Halide Lamps

Optimized for superior efficiency and lumen maintenance, these lamps provide up to a 25 percent increase in light output over standard metal halides, have quicker warm-up and restrike times and operate on more efficient ballasts.

White SON® High Pressure Sodium

In retail and decorative applications, Philips White SON® is three times more efficient than incandescent with an identical color temperature, bright white light, an outstanding CRI and peak performance in any burning position.

QL Induction Lighting

Invented by Philips in 1991, this electrodeless system features an extraordinary 100,000-hour life or 12 years of continuous operation which makes it ideal for hard-to-reach installations. Now with EMI-protected design and tool-free replacement ease.
